ROOTS FR Snood

Stay safe and protected

KEY FEATURES

ANTI-BACTERIAL

INHERENT FR

HYDROPHILIC

The FR Snood from ROOTS covers a large part of the face with a super light, anti-bacterial, hydrophilic and breathable material that keeps you safe, warm and dry. The special formulated fabric means it is inherently flame retardant, inherently bacteriostatic, inherently bactericidal and antifungal—for the lifetime of the snood. There are no 'spray on' chemicals whatsoever.

The snood can be worn in 5 different styles. Depending on how it is worn, the model offers protection for the head, neck, ears, nose and mouth.

Product features

- OEKO-TEX certified – stringently tested and therefore safe to be worn against the skin.
- 100% CO-2 neutral produced*
- Multi-wearable – can be worn in 5 different configurations.
- The hydrophilic fabric properties pulls perspiration away from the face and body
- Super lightweight fabric—comfortable to wear for long periods of time.

Product details

- Fully inherent
